

Task Flow Document

Proactive Monitoring

Description:

A police or tourism official monitors the real-time dashboard to view tourist density heat maps, analyze AI-detected anomalies, and maintain overall situational awareness.

Primary Roles:

- Police Officer
- Tourism Official

Secondary Roles:

- System Administrator
- Tourist

Task Flow Steps:

1. Access Monitoring Dashboard

The Police or Tourism Official securely logs into the VeriTour web-based dashboard using their authorized credentials.

2. View Real-Time Map

Upon login, the user is presented with a real-time map interface displaying anonymized tourist clusters, high-risk zones, and active alerts.

3. Analyze Tourist Heat Maps

The official analyzes the tourist density heat map to understand current crowd concentrations, identify potential overcrowding, and inform resource allocation.

4. Review AI Anomaly Alerts

The user navigates to the alerts panel to review system-generated anomalies, such as prolonged inactivity, sudden

location drop-offs, or significant route deviations flagged by the AI engine.

5. Investigate Specific Anomaly

If an alert warrants further attention, the official clicks on it to drill down into detailed information, including the tourist's itinerary, last known location, and the specific nature of the anomaly.

6. Assess Situational Context

The official cross-references the alert data with other map layers, such as weather warnings or known high-risk zones, to determine the severity and likelihood of a genuine incident.

7. Initiate Coordinated Response

If an incident is confirmed or highly likely, the user initiates the appropriate response protocol, which may involve dispatching a police unit, contacting the tourist directly, or alerting emergency services through the dashboard.

8. Log Findings or Escalate

The official documents their findings and actions within the incident management log. If the situation is resolved or deemed a false positive, the alert is closed. If it requires higher-level attention, it is escalated to a senior officer.
