

Task Flow Document

Tourist Onboarding

Description:

The process where an Entry Point official verifies a tourist's identity, captures trip details, and issues a secure Digital ID, which the tourist then activates on their mobile app.

Primary Roles:

- Entry Point Staff
- Tourist

Task Flow Steps:

1. Tourist Presents Documents

The tourist arrives at a designated entry point (e.g., airport, hotel) and presents their identity documents (Passport/Aadhaar) and trip details to the Entry Point Staff.

2. Staff Verifies Identity

The Entry Point Staff uses the VeriTour portal to scan the documents and initiates an automated verification process against government APIs (e.g., DigiLocker, Passport Seva).

3. Staff Enters Trip Details

Upon successful verification, the staff enters the tourist's trip itinerary, duration of stay, and emergency contact information into the portal.

4. System Generates Digital ID

The VeriTour system generates a secure, blockchain-based Digital Tourist ID and presents a unique QR code to the Entry Point Staff on their portal screen.

5. Tourist Scans QR Code

The tourist, having downloaded the VeriTour mobile app, uses it to scan the unique QR code displayed by the Entry

Point Staff.

6. Tourist Activates Profile

The app retrieves the Digital ID data. The tourist reviews their information, consents to the terms of service, and completes the activation process within the app.

7. Onboarding Confirmed

The system confirms the successful activation. The tourist's profile is now active in the safety monitoring system, and their app is fully functional with features like the safety score and panic button.
